

Our new topic is.....

## Misty Mountains and Raging Rivers!

For this half term project I would like you to locate 3 different mountains. One of them must be from the UK, but the others can be from anywhere in the world!

I would like you to:

- Locate them on a map and identify which continent they are in
- Have a look at them using Google Earth
- Find out how tall they are
- Find out what kind of mountain they are (mountains can be formed in different ways!)
- Order your three mountains in height order
- Find out any other interesting facts about your chosen mountains.

You can present this any way you like. If you want to challenge yourself further why don't you make up a story about the day you climbed a mountain? What adventures could you have?

Enjoy!
